Varna Suraksha Auto Model

Varna Car Care - an Ultrasonic Auto Rodent Repellent product specially designed to emit high decible ultrasonic waves between 20 Khz and 50 khz sound variations that can effectively repel rodents from your car. The sound is completely not audible to human ears, so there no chance of you hearing any noise from the car.

- Simple Installation
- Connect directly to the battery with provided wire.
- Auto Off while ignition is ON.
- Low Power Consumption (Just around 1 Unit per month)
- Will not affect other automobile parts or engine.
- Does not make noise which you can
- Safe with non rodent pets & kids

How to Install or Place the Unit

Repellent has to be fixed under the vehicle bonnet area away from the engine. Please check the unit functionality by pressing "TEST Button", you will hear a loud sound.

1. Fix the unit inside the Bonnet, SPEAKER FACING UPWARDS to rebound the ultrasonic sound throughout the bonnet area evenly.
2. Keep the unit away from the engine area.
3. Red Wire has to be connected to Positive Terminal of the Car Battery
4. Black Wire has to be connected to Negative Terminal of the Car Battery
5. Green wire has to be connected to Ignition Terminal.
6. Make sure the speaker is not obstructed.
7. If your car bonnet lid has heat insulation or heat proof layer, face the speaker towards the engine OR it is highly recommended to remove the insulation and face the unit towards the Bonnet Lid for 100% results.

Features

1. It does not kill : The electronic car repellent creates hostile environment to rodents, and forces them out from your vehicle engine area with sound waves that create intense auditory stress. Since our rodent repeller doesn't kill the mouse, you never come in contact with dead rat.
2. It is Safe to your automobile : Our electronic repellent will not interfere with other parts or engine functionalities.
3. One time and easy Installing : You need to just install once with a help of mechanic or by yourself if you are familiar with car engine area and parts. (It is recommended to install by a professional).
4. Power consumption from your battery : The repellent power consumption from your battery is very low, it will not have any undesirable effect by bringing your battery down. The power consumption is 1 Unit per month if it is working continuously.
5. Auto OFF : The Varna Car Care will work only when the car ignition is "OFF", once the car ignition is ON, the unit will go "OFF".
6. AC Power option (On Request Only)
If you would prefer to draw electricity from nearby AC power point for long time parking (more than a week) we will provide external adapter at an extra cost.

Warranty

Repellent comes with a warranty of one year against manufacturing defects from the date of purchase. The unit will be repaired under warranty only if all the usage instructions mentioned above have been followed and the unit is neither tampered with nor damaged in anyway.
